1 Comprised of all Global Strategies.

2 The data is based on a representative portfolio for the strategy. The representative portfolio changed in February 2019 following the implementation of a narrower definition of the ESG universe and again in July 2020 following the full redemption of the most significant unit holder in the Fund. Sectors are internally defined. Geographical exposure is calculated on a look through basis based on underlying revenue exposure of individual companies held within the portfolio. Exposures may not sum to 100% due to rounding. The Index is the MSCI World NTR Index. Refer to the Important Notice below for further information.

3 Returns are for the Global Sustainable Composite and denoted in USD. Performance would vary if returns were denominated in a currency other than USD. Refer to the GIPS Disclosure section below for further information. Composite (Net) returns are net of fees charged to clients and have been reduced by the amount of the highest fee charged to any client employing that strategy during the period under consideration. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size. Fees are available upon request.

^ Combined risk ratio is a measure of relative beta and relative drawdown to MSCI World NTR USD Index. Please contact MFGAM should you wish for further details on the calculation.

\* Returns are only for part year.

#### IMPORTANT NOTICE

This material is being furnished to you to provide summary information regarding Magellan Asset Management Limited trading as MFG Asset Management (**'MFG Asset Management'**) and an investment fund or investment strategy managed by MFG Asset Management (**'Strategy'**). This material is not intended to constitute advertising or advice of any kind and you should not construe the contents of this material as legal, tax, investment or other advice. In making an investment decision, you must rely on your own examination of any offering documents relating to the Strategy.

The investment program of the Strategy presented herein is speculative and may involve a high degree of risk. The Strategy is not intended as a complete investment program and is suitable only for sophisticated investors who can bear the risk of loss. The Strategy may lack diversification, which can increase the risk of loss to investors. The Strategy's performance may be volatile. Past performance is not necessarily indicative of future results and no person guarantees the future performance of the Strategy, the amount or timing of any return from it, that asset allocations will be met, that it will be able to implement its investment strategy or that its investment objectives will be achieved. Statements contained in this material that are not historical facts are based on current expectations, estimates, projections, opinions and beliefs of MFG Asset Management. Such statements involve known and unknown risks, uncertainties and other factors, and undue reliance should not be placed thereon. This material may contain 'forward-looking statements'. Actual events or results or the actual performance of an MFG Asset Management financial product or service may differ materially from those reflected or contemplated in such forward-looking statements. The Strategy will have limited liquidity, no secondary market for interests in the Strategy is expected to develop and there are restrictions on an investor's ability to withdraw and transfer interests in the Strategy. The management fees, incentive fees and allocation and other expenses of the Strategy will reduce trading profits, if any, or increase losses.

No representation or warranty is made with respect to the correctness, accuracy, reasonableness or completeness of any of the information contained in this material. This information is subject to change at any time and no person has any responsibility to update any of the information provided in this material. This material may include data, research and other information from third party sources. MFG Asset Management makes no guarantee that such information is accurate, complete or timely and does not provide any warranties regarding results obtained from its use. MFG Asset Management will not be responsible or liable for any losses, whether direct, indirect or consequential, including loss of profits, damages, costs, claims or expenses, relating to or arising from your use or reliance upon any part of the information contained in this material including trading losses, loss of opportunity or incidental or punitive damages.

No distribution of this material will be made in any jurisdiction where such distribution is not authorised or is unlawful. This material does not constitute, and may not be used for the purpose of, an offer or solicitation in any jurisdiction or in any circumstances in which such an offer or solicitation is unlawful or not authorized or in which the person making such offer or solicitation is not qualified to do so. This material and the information contained within it may not be reproduced, or disclosed, in whole or in part, without the prior written consent of MFG Asset Management. Further information regarding any benchmark referred to herein can be found at [www.mfgam.com.au](http://www.mfgam.com.au). Any trademarks, logos, and service marks contained herein may be the registered and unregistered trademarks of their respective owners.

**United Kingdom** - This material does not constitute an offer or inducement to engage in an investment activity under the provisions of the Financial Services and Markets Act 2000 (FSMA). This material does not form part of any offer or invitation to purchase, sell or subscribe for, or any solicitation of any such offer to purchase, sell or subscribe for, any shares, units or other type of investment product or service. This material or any part of it, or the fact of its distribution, is for background purposes only. This material has not been approved by a person authorised under the FSMA and its distribution in the United Kingdom and is only being made to persons in circumstances that will not constitute a financial promotion for the purposes of section 21 of the FSMA as a result of an exemption contained in the FSMA 2000 (Financial Promotion) Order 2005 as set out below. This material is exempt from the restrictions in the FSMA as it is to be strictly communicated only to 'investment professionals' as defined in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (FPO).

**United States of America** - This material is not intended as an offer or solicitation for the purchase or sale of any securities, financial instrument or product or to provide financial services. It is not the intention of MFG Asset Management to create legal relations on the basis of information provided herein. Where performance figures are shown net of fees charged to clients, the performance has been reduced by the amount of the highest fee charged to any client employing that particular strategy during the period under consideration. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size. Fees are available upon request and also may be found in Part II of MFG Asset Management's Form ADV.

The MSCI World Index (Net) is a free-float adjusted market capitalization weighted index that is designed to measure the equity performance of 24 developed markets. Index results assume the reinvestment of all distributions of capital gain and net investment income using a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.

#### GLOBAL INVESTMENT PERFORMANCE STANDARDS (GIPS®) DISCLOSURE

Magellan Asset Management Limited, doing business as MFG Asset Management in jurisdictions outside Australia and New Zealand, (MFG Asset Management) claims compliance with the Global Investment Performance Standards (GIPS®)

For the purpose of complying with GIPS, the Firm is defined as all discretionary portfolios managed by MFG Asset Management, excluding brands managed by subsidiaries operating as distinct business entities. MFG Asset Management is a wholly-owned subsidiary of the publicly listed company Magellan Financial Group Limited. MFG Asset Management is based in Sydney, Australia. Total Firm assets is defined as all assets managed by MFG Asset Management, excluding assets managed by subsidiaries operating as distinct business entities.

The Global Sustainable composite is a concentrated global equity strategy investing in high quality companies (typically 20-50 stocks) with an integrated ESG risk assessment process, including a low carbon overlay. High quality companies are those companies that have sustainable competitive advantages which translate into returns on capital materially in excess of their cost of capital for a sustained period of time. The investment objectives of the Global Sustainable strategy are to earn superior risk adjusted returns through the business cycle whilst minimising the risk of a permanent capital loss with meaningfully lower carbon intensity than broader equity markets. Prior to May 29, 2018 the composite was named the Global Low Carbon Composite. As at 1 February 2019, the composite was redefined to exclude portfolios utilising specific ESG exclusions on societal grounds, in addition to the integrated ESG risk assessment process and low carbon overlay, due to a narrower definition of the ESG universe.

To achieve investment objectives, the composite may also use derivative financial instruments including, but not limited to, options, swaps, futures and forwards. Derivatives are subject to the risk of changes in the market price of the underlying securities instruments, and the risk of the loss due to changes in interest rates. The use of certain derivatives may have a leveraging effect, which may increase the volatility of the composite and may reduce its returns.

A copy of the composite's GIPS compliant presentation and/or the firm's list of composite descriptions are available upon request by emailing [client.reporting@magellangroup.com.au](mailto:client.reporting@magellangroup.com.au)

The representative portfolio is an account in the composite that closely reflects the portfolio management style of the strategy. Performance is not a consideration in the selection of the representative portfolio. The characteristics of the representative portfolio may differ from those of the composite and of the other accounts in the composite. Information regarding the representative portfolio and the other accounts in the composite is available upon request.

USD is the currency used to calculate performance.

## Market Commentary

---

Global stocks hit record highs in the three months to September as they rose for the sixth quarter in seven after reports showed stimulus is helping reopening economies recover from the pandemic, the Federal Reserve indicated it would keep rates low for a while yet, and tech stocks reported earnings that showed how much they have benefited from the shift to online. During the quarter, 10 of the 11 sectors rose in US-dollar terms. Consumer Discretionary (+16%) rose the most as economies reopened while Energy (-16%) was the sector that declined. The Morgan Stanley Capital International World Index climbed 7.9% in US dollars.

US stocks set fresh record highs after readings showed the jobs market had recovered nearly 50% of the jobs lost when the economy was closed to restrict the pandemic, Big Tech shone and the Federal Reserve moved to a flexible average inflation target by allowing inflation to exceed 2%. The Fed's shift suggested lower interest rates for longer as it indicated the central bank would not pre-emptively raise interest rates when unemployment was low as long as inflation was under control. During the quarter, reports indicated the US economy was recovering from the record 31.4% annualised decline in the second quarter. Of note, a report showed the jobless rate fell to 8.4% in August and that the economy had added 10.6 million jobs since it shredded 22.2 million jobs in March and April when the jobless rate was 14.7% (compared with 3.5% in February). Big Tech CEOs were grilled by congress over the alleged anti-competitive nature of their businesses as the tech icons posted healthy earnings for the second quarter. In political news, the Democratic and Republican parties held their conventions and at quarter end polls placed Democrat presidential nominee Joe Biden ahead of President Donald Trump in the quest for the White House. The S&P 500 Index rallied 8.5%, to complete its best back-to-back quarters since 2009.

European stocks fell as reinfection rates picked up enough for restrictions to be reimposed. Of note during the quarter was that EU leaders struck an agreement to allow the EU to sell debt on a large scale for the first time so it could install a 750-billion-euro pandemic recovery fund. The Euro Stoxx 50 Index fell 1.3%. Japan's Nikkei 225 Index added 4.0% on the better global outlook as investors looked past the record annualised economic contraction of 28.1% in the second quarter and the unexpected resignation due to ill health of Prime Minister Shinzō Abe (who was replaced by Yoshihide Suga). China's CSI 300 Index surged 10.2% after a report showed the country's economy grew 3.2% in the June quarter from a year earlier, making China the first major economy to return to growth. Australia's S&P/ASX 200 Accumulation Index lost 0.4% amid concerns that Victoria's second lockdown was causing vast economic damage. The MSCI Emerging Markets Index rallied 8.7% in US dollars as key countries contained the virus and commodity prices gained.

## Strategy Commentary

---

The portfolio recorded a positive return for the quarter. The biggest contributors were the investments in Alibaba Group, Facebook and Chipotle Mexican Grill. Alibaba rallied after the Chinese e-commerce giant reported revenue growth of 34% in the second quarter from a year earlier as lockdowns turned Chinese to online retail, and China's economy rebounded. Facebook rose after its 11% surge in second-quarter earnings beat expectations and the social-media company said its main site has 2.7 billion users per month. Chipotle rose as US states eased restrictions and the company's beefed-up online ordering helped boost sales when restrictions took hold.

The biggest detractors were the investments in Danone and Novartis. Danone declined after management provided second-half margin guidance that was lower than expected due to higher costs during the pandemic, a slower-than-expected recovery in the Waters division, and a 100-million-pound planned investment in marketing and digital capabilities. Novartis fell after the health-products group refused to discuss revenue or profits prospects when revealing that sales for the first half rose 1%, the higher end of expectations.
